

Draw-A-Scientist

Name:

Date:

Period:

Directions: Scientists are people who gather evidence to test questions about the world. Your idea of what a scientist looks like might differ from someone else's. In this activity, you will draw what you think a scientist doing science looks like. It is important that your scientist is **DOING** something scientific and **NOT** just standing there. It does not matter if you consider yourself an artist or not. Try your best, use all the supplies provided, and draw your scientist.

Drawing:

Explanation: Briefly explain what your scientist looks like and the type of science they are doing.
